

# 2 Speed rear end sticker installation instructions

1. Before peeling the backing off the sticker test the position on your dash to get an idea where it needs to go.
2. The correct position for the sticker is above and just to the left of the center of the speedometer. Use the diagram below (from the factory assembly manual) and the picture as a guide.

\* - Extra cost items

Some of the info to produce this sticker was gleaned from the Stovebolt Page ([www.stovebolt.com](http://www.stovebolt.com)) and the guys over in the Big Bolt Forum. Be sure to stop by and give them a shout.
