

Mongo's Garage Presents

MongoRolla 54

Futuristic technology in a classic package

AM/FM/Stereo Radio

Fits 1954 & 1955 First Series Chevy and GMC Trucks, Suburban's, Panels and Big Trucks too.

Why pay big money to restore an original radio when you can have new?

Analog controls look and feel like the original radio.

Installs in your dash without any modifications.

Looks original performs better!

Auxiliary input supports CD, MP3 Player, or Satellite Radio.

LED dial lights will never need replacing.

Why settle for a cheap modern radio that's sort-of-made to fit, or install a hidden audio system when you can have the real thing plus so much more? These new radios have the look and feel of the original radio, but with the performance you expect from today's technology. From the dash, every piece you see has been designed to match the original. For example, the thread and diameter of each shaft bushing is the same as was used originally. The dial fonts are exact duplicates. The dash bezels are die cast. The tuning knob makes the dial pointer move the way they're supposed to. No digital displays here! Behind the dash it's a different story. Powerful electronics are built into a chassis that is only 2-1/2 " deep, making the radio nearly 10% of the original size!

There is room for electric wipers and/or air conditioning! The Radio has RCA inputs for CD, MP3 Player or Satellite options. Subtly printed in the dial background is the FM dial scale. Inside the case is our proven digital tuner system with a 180 watt RMS power amplifier! Two powerful microprocessors monitor the "human interface" (knobs) and, through the magic of software, makes the radio dial imitate the original while pumping out a sound that is cleaner and much more powerful than the best radio that was available when your truck was new!

Ask about applications for trucks with 6 volt systems. Each radio comes with a detailed instruction booklet explaining speaker options, installation, operation, troubleshooting tips, and information about connecting CD, MP3 Player or Satellite options.

**Designed and manufactured in the USA by American workers
Just like your truck was!**
